PROFESSIONAL SUMMARY

Computer Science graduate with university-level teaching experience and a strong foundation in software engineering, algorithms, object-oriented programming, and Python. Currently completing the Applied Artificial Intelligence (AI.SPIRE) Program with hands-on experience in Machine Learning, NLP, OCR, RAG, Knowledge Graphs, and LLM applications. Passionate about building practical AI solutions using Python, FastAPI, Streamlit, Docker, PostgreSQL, Hugging Face, and PyTorch.

TECHNICAL SKILLS

- Programming: Python, SQL, Java, C++, JavaScript
- AI: Machine Learning, Deep Learning, NLP, OCR, Document AI, LLMs, Transformers, RAG, Embeddings, Prompt Engineering, Model Evaluation
- Frameworks: FastAPI, Streamlit, Hugging Face, PyTorch, Scikit-learn, spaCy
- Databases: PostgreSQL, SQLAlchemy
- Tools: Git, GitHub, Docker, VS Code, Jupyter Notebook, Linux

PROFESSIONAL EXPERIENCE

Teaching Assistant – Jordan University of Science and Technology (2021–2022 & 2018–2019)

- Delivered programming labs.
- Taught Python, Java, C++, Algorithms, Data Structures, OOP, Android.
- Mentored students, explained complex technical concepts, and strengthened documentation and communication skills that support effective AI project collaboration and knowledge sharing.

Programming Trainer – British American Center (2021–2022)

- Delivered programming and ICDL courses.
- Prepared practical coding exercises and developed clear technical explanations, strengthening the ability to onboard teammates and communicate AI concepts effectively.

Office Administrator & IT Trainee – CTS Computec Solutions (2022–2023)

- Managed examination schedules and administrative operations.
- Provided technical support.

SELECTED AI PROJECTS

AI-Powered Arabic Court Order Information Extraction (Capstone)

Developed an AI-powered pipeline using Python, FastAPI, Streamlit, OCR, Docker, PostgreSQL, Git, and NLP. Processed a dataset of 50+ Arabic court documents and extracted structured entities for human review and JSON export.

Retrieval-Augmented Generation (RAG)

Built a semantic retrieval pipeline using embeddings and LLMs, retrieving the Top-5 most relevant document chunks to improve response grounding.

AI Sentiment Analysis

Fine-tuned a Hugging Face Transformer using PyTorch, achieving approximately 64% classification accuracy on the evaluation dataset.

Knowledge Graph Construction

Built RDF knowledge graphs and executed SPARQL queries to model entities and relationships for semantic retrieval.

Question Answering Evaluation

Evaluated QA systems using Exact Match (EM) and F1 metrics on benchmark question-answer datasets.

Madraсты

Educational software project for the Injaz competition.

EDUCATION

AI.SPIRE: Applied AI and ML Systems

LevelUp Economy & Istidama Consulting

Feb – Jul 2026

Python for AI - Applied NLP & Knowledge Systems

- 24-week intensive program covering applied NLP, machine learning, RAG systems, and Knowledge Graphs
- Built and deployed end-to-end AI systems integrating NLP pipelines, vector search, and APIs
- Developed professional skills in technical communication, teamwork, and AI system documentation

Bachelor of Computer Science

Jordan University of Science and Technology

2012–2017

Grade: Good

CERTIFICATIONS

Teacher Training Program

Programming Academy Training

Technical Workshops (Android, Oracle, PHP, JavaScript, Node.js, TypeScript, Python, ASP.NET, Arduino, C#)

LANGUAGES

Arabic: Native

English: Professional Working Proficiency

CORE COMPETENCIES

Problem Solving • Analytical Thinking • Communication • Team Collaboration • Adaptability • Time Management • Continuous Learning
